Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed February 20, 2004 has been made of record and the references cited therein have been considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by
Lewkowicz et al. (U.S. Patent Application Publication No. 2003/0040685).

In regard to claims 1-6, Lewkowicz et al. teach a device 10 that is inserted into a body lumen 100 where the device may be shaped or sized to resemble a target diagnostic or therapeutic device, which itself is desired to be passed through the lumen 100, for example, a swallowable imaging device for purposes of imaging the GI tract

(see Figure 1A and page 4, section 0050). The device 10 can be safely passed through the GI tract, to test the transferability of such as device through the GI tract while its progression can be monitored (see page 4, section 0050). According to one embodiment, the device 20 comprises an outer coating 24 and an internal filling 22 (see Figure 2A). The outer coating is typically a layer or plurality of layers of impermeable or slightly permeable material or combination of materials, that is essentially durable under in vivo conditions (see page 4, section 0051). Lewkowicz et al. also teach another embodiment of the device 400 having an outer coating 404 and an internal filling 402 where the filling 402 may further comprise a marker 403, such as radio opaque material (see page 7, section 0076).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should note the following prior art references disclosing swallowable devices for testing: Marshall, U.S. Patent No. 6,228,605 and Kraizer et al., U.S. Patent Application Publication No. 2005/0063906.
